I'll have it up in a minute—thanks! And I'll remove Danny and Jeff from the threads.

And I'll have a separate question about press releases in a minute.

Thanks!

Subject: Data to post

hi Tim--we have two data sets to post today (attached).

here is the language/narrative.

Main data page:

EPA water quality data collected in the Animas and San Juan rivers in New Mexico on Aug. 6 and 12, 2015, including locations in Aztec and Farmington.

Page for data for specific date:

Today, EPA has released additional water quality data from Aug. 6 and 12, 2015, on the Animas and San Juan rivers in New Mexico, including locations in Aztec and

Farmington.

To assess the impacts of the release at the Gold King Mine, water quality samples were collected at two locations for 24 metals. Each surface water sample was analyzed for metals including arsenic, cadmium, lead and mercury.

Due to the highly variable conditions typical of this segment of the river, additional testing will be conducted, and we continue to work closely with the State of New Mexico on assessing drinking water, agriculture, livestock, and other critical water needs.

Water quality data from Aug. 6 and 12, 2015, on the Animas and San Juan rivers in New Mexico:
